

Thin Mints, STREAM girls and trout

Outdoors

By Anne Janik

Cookies, Girl Scouts, and trout may seem like an unusual combination, but, last month, 18 Girl Scouts from Western Slope chapters became STREAM Girls. This Colorado Trout Unlimited workshop is designed to introduce youth to their local watershed through river conservation and recreation. STREAM stands for STEM, recreation and art. Ross Reels, Able Women, and the local Trout Unlimited (TU) chapter — the Gunnison Gorge Anglers hosted the workshop.

The day started with an icebreaker where the girls were grouped by their favorite Girl Scout cookie. Barbara Luneau, TU youth programming volunteer, engaged the girls in a watershed discussion. She explained the path of our rivers from their headwaters to their terminus. The Uncompahgre and Gunnison Rivers are tributaries to the Colorado River, which comprises the third largest watershed in the country. The Columbia River Watershed is second, and the largest watershed in the U.S. is the Mississippi River. “Our rivers here are very hard working with many demands for drinking water, irrigation, livestock and recreation. These rivers are closely managed to meet everyone’s needs,” Luneau explained. “How much water do you think makes it to the Gulf of Mexico? Very little.”

The new Colorado Outdoor facility in Montrose provided easy access to the Uncompahgre River, where the girls explored the river corridor. Volunteers guided the girls with probing questions to help them use all their senses to observe the nuances of the river and adjacent riparian habitats as if through the eyes of a scientist, angler, and artist. The girls described the river sounds and smells, and sketched their observations in their STREAM Girls field notebook.

Ready to learn how to measure

Ada Malott and Giselle Keller-Chibiko reference an aquatic insect guide to identify species. (Submitted Photo/Anne Janik)

stream flows, the girls stepped into a small channel of the main river wearing hip waders. The scouts timed the travel of a ping-pong ball from a release point upstream to its catch by a scout 30 feet downstream, repeating this three times for an average. The girls rocked at the math, calculating channel area (average width and depth), velocity (distance and time), and finally flow in cubic feet per second. “This is math under pressure adding, dividing, and multiplying without a calculator!” said Luneau. Kick nets were next on the agenda. The girls stirred up the stream bottom with their feet so aquatic insects drifted into the nets. With giggles and laughter, the girls enthusiastically scuffled about while trying to keep their balance! They rinsed the nets into buckets, and transferred samples into trays for critter identification.

Referencing an insect guide, the girls identified species by using characteristics like shape, tails, location of gills, and cases. Of course, this activity also required math skills to determine overall stream health using the diversity of specific bugs (Caddis flies, Mayflies and Stoneflies) and their abundance. Luneau explained that high numbers of these bugs, which are highly sensitive to pollution usually indicate a healthy stream. Guess what? This section of the Uncompahgre River scored well! With a grasp of stream flows and aquatic insects, the girls had a better idea of where trout hang out and what they like to eat basics for a successful angler. This is where the Gunnison Gorge Anglers stepped in to help each girl set up her fly rod and learn to cast. The girls and instructors began casting around the pond. Each Scout

looked like they were determinedly practicing the summoning charm from Harry Potter, “Accio -trout” that will magically bring whatever item is summoned. Fly fishing is all about tricking the fish into biting your artificial fly thinking it is the real thing, and the art of fly tying is to imitate the look of those tasty morsels. After identifying the common aquatic insects, the Scouts had a better idea of what those morsels look like. Now, sitting at a fly tying station, each scout was patiently guided by a CTU volunteer on how to tie a midge or a winged emerger. With quiet concentration, the girls carefully created art for fishing. To recap the day, the Scouts returned to the river to complete a scavenger hunt for the key ingredients of a stream, and began working

Learning about the outdoors

Most people who recreate outdoors, be it hunting, fishing, camping, backpacking or hiking, learned about it through experience. The old “college of hard knocks” has been my biggest education tool, and still is for that matter.

When I was a kid, I wanted to learn everything I good about the outdoors and survival. I figured when I knew enough, I would move into the mountains and live off the land and never be bothered by school or work.

My grandparents no longer hunted or camped by the time I came around. In order to stop my constant complaining about wanting to learn woodcraft, they pawned me off on an old man who was a friend of the family. Mr. Caster was the perfect instructor for my 12-year-old brain.

Mr. Caster hunted, fished and camped whenever he felt like it. He was retired so work never got in the way of his outdoor pursuits. Mr. Caster cussed like a sailor on shore leave, smoked Chesterfield Kings and drank whiskey from a bottle, in other words, a perfect role model.

I eventually learned how to build a fire using a few pieces of kindling, a small pile of tinder, and half a box of strike anywhere kitchen matches. He taught me how to cook over a fire, and eventually

Tips from the Posse

By Mark Rackay

eat the stuff I cooked. Mr. Caster taught me about wild animals and tracking. I learned that when you see fresh bear tracks, close by there is probably a fresh bear. With Mr. Caster, whining was not an option, as he had little tolerance for complainers. If I became injured (which was a regular occurrence, Mr. Caster taught me how to mop up the blood and “tough it out.” Seriously, there is very little, if any, formal training for people who want to learn basic survival and woodcraft skills. People asking for guidance, and learning opportunities ask me regularly where they should turn. Most of us have turned to outdoor magazines and books. There are literally hundreds of books available on the subject, but reading a book does not carry the same power of live teaching. The computer is a good place to research these skills, and there are a number of classes you can take on-line, but I still prefer live teachers. Recently I was asked to help out several teachers at Olathe Middle School

with an annual program for all middle school kids, called Problem Based Learning or PBL. PBL places a problem at the feet of the students who work as a group of three. The group of students then gets to research the subject, both in books and on-line. Then a panel of experts comes to meet with each group and agrees to be interviewed and questioned on the assigned subject, thereby providing insight to the young minds. There were seven teachers involved in this years exercise, including Judy Hauger, Michelle Tracy, Tyler Shaw, Judy Jacobs, Mark Liebenthal, Marc Alton and Paige Ready. The subject for this PBL was survival and it was given to about 40 kids. Each group of kids was assigned a location where they are stranded and in need of rescue, but must survive. They would need to decide what items they would need to survive, what items they could bring. Each group was given a machete and a pan to hold water. The group was allowed to select one “mystery item” of their choice to bring along. For several weeks, the kids researched the area they were stranded in. Some were in the rainforest, Rocky Mountain National Park, African Desert and the Tundra near the Arctic Circle. The kids must learn the

FROM PAGE A9

climate; extreme weather conditions possible, edible plants, poisonous plants, and animals for food source and dangerous animals.

The students were also given a session with local experts in search and rescue. Paul Gottlieb of the Posse and Hunter Safety Instructor David Hardman were the panel the kids got to interview. They asked about what equipment was necessary, first aid skills, and how to signal for help, among other things.

Once the kids completed the projects, each group had to make a presentation to a panel of experts and teachers. The panel for the presentations consisted of David Hardman, Jim Neigherbauer and me from the posse. When the presentation was complete, the panel asked questions of the kids.

Each group started with a computer screen presentation of their location where they were stranded. The kids described in detail the climate and weather hazards faced. Shelters were to be built and the kids gave detailed accounts of the material to be used and the matter in which it would be water and weather proofed.

Food sources, including plants and animals were also discussed, and the methods they would use to harvest them. Most kids had a different idea on how they would build a fire and find, purify and store water.

After the video presentation, the kids showed off a diorama made by them. The diorama displayed a model of their shelter, water source, fire, and the plants and animals indigenous to their area. The presentation lasted around 10 minutes and the panel

If you are taking to the friendly skies this holiday season, or on a future hunting trip, and firearms are going with you, here are a hints to make your travel easier. (Special to the Montrose Daily Press/ Mark Rackay)

asked several questions of each group and made comments.

These kids were absolutely amazing. They had a good answer for every question thrown at them. The presentations made by them were delivered well and thoroughly researched. I congratulate the students and teachers for a job well done.

I doubt these kids are ready to dive into a survival situation of the magnitude presented to them, but they are on a course for success. The concept is to get them thinking and solving problems as they are thrown at them. and they responded well. Each of their

scenarios included one of them getting hurt or sick, and they had a plan to deal with it; yes, learning about my old pal Murphy and dealing with him.

I wish more teachers would use a survival-based situation for the PBL program like this bunch from Olathe Middle School. Kids get stranded in the woods just like adults and it is never too early to teach these necessary skills.

Not everyone has a Mr. Caster to teach them about the woods and survival. He passed away when I was around 20 and I have thought about him often. Sometimes I go up in the

woods and can still feel his presence, and realize how much I miss him and his surly way of teaching.

Mark Rackay is a columnist for the Montrose Daily Press and avid hunter who travels across North and South America in search of adventure and serves as a Director for the Montrose County Sheriff’s Posse. For information about the Posse call 970-252-4033 (leave a message) or email info@mcspi.org

on a necklace. Colored beads represent those key ingredients: water, wood, rocks, and plants with the added charms of mayflies, feathers, and bugs. Kate Senn from Ross Reels, a Girl Scout alumna, awarded the Scouts their new patch, and congratulated each with their special Scout handshake. What was their favorite part of the day? “Going into

the water with the waders; ... finding all the bugs; ...being able to see what’s in the water,” were a few of their responses. The day undoubtedly inspired new, young anglers, but their experience of standing in the river and understanding the river dynamics will be remembered long and vividly. Kudos to all Colorado Stream Girls — our rivers need more stewards.

Colorado Trout Unlimited provides a voice for our rivers. CTU works to conserve, protect, and restore Colorado’s coldwater fisheries and their watersheds. CTU offers a week long River Conservation and Fly Fishing Camp designed to educate 14 to 18 year old students. For more information visit: https://coloradotu.org/

youthcamp.

Gunnison Gorge Anglers, a chapter of CTU, hosts multiple activities including youth education, fly casting and fly tying lessons, and stream improvement projects. For more information visit: gunnisongorgeanglers.tu.org

Able Women is a non-profit public outreach initiative designed to spread the word about fly fishing and the many emotional, physical, and spiritual benefits it brings to women. Find out more at: ablewomenflyfish.com

Friends of Youth and Nature is a non-profit that promotes opportunities for youth and families to go outside, experience outdoor activities, and explore nature. For more information visit: friendsofyouthandnature.org
